

NATIONAL TREE DAY

National Tree day is a call to action for all Australians to get their hands dirty and give back to the community.

This year all Grade 3 and 4 students were given a seedling to take home and each class planted a seedling on the day. The seedlings provided were 'native' plants which are a source of food and shelter for the wildlife that call our school home.

A huge thank you to the Eltham rotary club and the Edendale Community Environment Farm for donating seedlings to our school so that we can participate in this great initiative.
